DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeCampli (5,571,127) in view of Roberts et al. (5,344,424) and further in view of Haber et al. (5,599,351). DeCampli discloses a surgical disposable scalpel comprising a sharp blade 50, a blade-fixing member 40 fixed to the rear end of the blade 50, and a handle 20 enclosing the blade-fixing member 40. Roberts teaches a surgical scalpel 10 comprising a sharp blade 14 integrally fixed to the blade-fixing member 33. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to modify DeCampli by having the blade integrally fixed to the blade-fixing member in view of Roberts to eliminate connection between the blade and the bladefixing member. DeCampli in view of Roberts discloses the invention as claimed, including a first fixing projection 27 extending from the top surface of the blade-fixing member 40, except for the second fixing projection. However, Harber discloses a surgical scalpel as shown in figure 5 comprising a blade-fixing member (S3,D3) having a first fixing projection 114 interlocked with the first fixing groove 108 and a second fixing projection 122 interlocked with the second fixing groove 104. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to

further modify DeCampli by having a second fixing projection interlocked with the second fixing groove in view of Harber to provide an interlocking means when the blade-fixing member is retracted into the blade enclosing member.

Regarding claim 3, DeCampli discloses the main body 20 defining a cavity for receiving the blade-fixing member 40, separation-preventing plate (21a,21b) and reciprocating aid slot 28.

Regarding claims 4-6, same as to claims 2-3 above.

Response to the Applicant Arguments

Applicant's arguments filed on 8/10/05 have been fully considered but they are not persuasive. The examiner uses the Roberts et al. reference for the teaching of a sharp blade 14 integrally fixed to the blade-fixing member 33. This teaching is clearly shown in figure 4.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/700,551

Art Unit: 3731

the advisory action. In no event, however, will the statutory period for reply expire later

Page 4

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Charles H. Sam whose telephone number is (571) 272-

4703. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Anhtuan T. Nguyen can be reached on (571) 272-4963. The fax phone

number for the organization where this application or proceeding is assigned is 703-

872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
